About Me

Hello! I am Sanchita, a first-year Mechanical Engineering student with a strong interest in technology and innovation. Along with my core engineering studies, I am actively learning web development using HTML, CSS, and JavaScript.

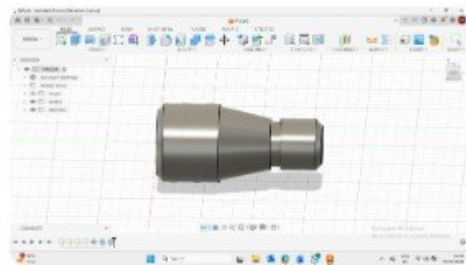

I enjoy creating simple and functional websites, and I am constantly improving my skills by building small projects. I have also worked on practical projects like an Automatic Watering System using Arduino, which helped me understand real-world problem solving.

I am a curious learner who likes exploring new ideas, improving technical skills, and working on creative solutions. My goal is to grow as an engineer and develop useful projects that can make everyday life easier.
